

Health Optimization

Integrative Medicine Consultation with Oligoscan

Our holistic doctor consultation focuses on investigating all your daily practices and health issues to gain a complete picture of you, not just alleviating the symptoms.

Moreover take a detailed personal and family history and understand your health goals. Consultation includes screening for symptoms of physiological imbalance using oligoscan to rule out

minerals, risk of developing toxic metal poisoning and factors contributing to oxidative stress

770 AED

Nutrition Advice & Body Composition Analysis

AED 330

After building a detailed picture of your lifestyle, eating habits, and medical history, we will guide you to the best nutrition plan that suits your needs.

Health Optimization

Medical Clinic Therapies

Angel of Water 30 mins | AED 550

A non-invasive and secure therapy; it improves health by removing toxins and stimulates the digestive system, boosts your energy, and enhances your immune system. Pulsating Electro-Magnetic

Lab Tests

Laboratory Testing Gold AED 1,350

Laboratory Testing Silver AED 600

Food Intolerance AED 2,250

Oxygen Therapy AED 220

This treatment facilitates and optimizes the oxygen utilization of cells and tissues. It improves blood circulation and reduces heart rate while enhancing physical performance.

Celloxy Therapy

1 Session AED 1,100
3 Session AED 2,200

Sodium Inhaler AED 220

Inhaling sodium bicarbonate helps alkalizing the cells and draw out toxins, quickly heal throat soreness, release sinus pressure, detox the respiratory tract and soothe the throat, sinuses and lower respiratory tract.

Ozone Sauna AED 440

The combined action of moist heat and ozone cleanses the lymphatic system. It increases blood circulation, oxygen, and nutrient delivery within the body, burns calories, and loosens muscles.

Cryo Cabin AED 330

Cryotherapy speeds up muscle recovery and relieves pain from any part of the body. It helps with weight loss and enhances general health and wellness.

IV Therapy

A method encompassing delivery of micronutrients in the form of IV vitamins, minerals, antioxidants and amino acids into the body to enhance your metabolic status and sense of wellbeing.
